

Manage Your Pixel Landscape. Solstice features a spectrum of management and configuration capabilities to support a broad range of use-cases and IT network requirements. Customize your Solstice display welcome screens, enable secure access for both corporate and guest network users in the same meeting, encrypt all Solstice network traffic, and much more – all with Solstice’s admin tools. The standard version of Solstice provides a multitude of configuration options on a one-to-one basis, while Solstice Enterprise Edition expands on the configuration and management features set and offers the ability to leverage that functionality on a centralized, one-to-many basis via the Solstice Dashboard for Enterprise Edition. Please refer to the table below for a full overview of the configuration and management capabilities available with Solstice.

Features Comparison: Solstice Configuration Panel vs. Solstice Dashboard

| <i>features & capabilities</i> | Solstice Configuration Panel | Solstice Dashboard for Enterprise Edition |
